

Content Management System

Complete, cutting-edge CMS for quick and easy creation, edits

PRODUCT
SHEETS

Content is king. And your valuable members crave information that is timely, fresh and relevant. YourMembership.com delivers complete content management control that allows you to manage entire site content with no programming required. Simply use the site's WYSIWYG editor to create new content on the fly or copy-paste from applications like Word.

YourMembership.com's CMS solution puts you in control. Create, manage and update content on your homepage, news section, resources section, and more. Embed rich media such as audio and video files.

Quickly create and post events, careers, e-newsletters and bulk email messages. Build an online store with multiple categories. You can even create interactive surveys for your members with complete results reporting. With YourMembership.com's CMS, you can also upload files once and use multiple times throughout your online community.

YourMembership.com also offers an intuitive custom pages tool. With this tool, you can build as many custom pages and custom forms as needed. And for managing your online community's navigation menu, YourMembership.com communities include an easy-to-use menu builder – all with no programming needed.

YourMembership.com's CMS allows you to:

- Take complete control of content management
- Embed rich media like audio and video files
- Set public/member access security per page
- Establish social/professional networking access to members
- Publish content via WYSIWYG editor
- Upload a data file once and use multiple times across the site
- Embed offsite content via RSS feed integration
- Upload/manage access to files, images and documents
- Create and manage main/sub menus
- Establish an online store with categories
- Create and post events
- Create and send rich text, HTML or plain text emails
- Create customized surveys, quizzes and polls
- Create and manage career categories
- Create custom pages and custom forms
- Link to offsite content from main menu
- and more!
