

Plug-in for Blackbaud's The Raiser's Edge

Optional add-on product allows easy synchronization of core member data

YourMembership.com's plug-in for Blackbaud®'s The Raiser's Edge® software is an optional add-on product that enables the automated, on-command synchronization of core member data between YourMembership.com and The Raiser's Edge.

Plug-ins are independent software tools that can perform a variety of functions within other software applications. Developed specifically for The Raiser's Edge, the YourMembership.com plug-in facilitates two-way synchronization of core member data between The Raiser's Edge and YourMembership.com.

The plug-in includes configuration and synchronization features, and once installed the YourMembership.com plug-in is accessible via the Plug-in Menu within your local version of The Raiser's Edge software.

Is there a fee for the plug-in?

The YourMembership.com plug-in for The Raiser's Edge is an optional add-on product available for a simple, straightforward fee as outlined below:

- One-Time Setup Fee: \$295
- Annual Fee: \$495

How do I configure the plug-in?

YourMembership.com's plug-in for The Raiser's Edge features an intuitive configuration wizard that allows you to easily and precisely configure the plug-in to meet your data synchronization needs.

You may utilize the configuration wizard to: set the plug-in to synchronize by constituent code and address types; map YourMembership.com member types to The Raiser's Edge constituent codes; configure the plug-in to manage and map certain fields, and more. Once the YourMembership.com plug-in configuration is set, these settings are saved and you can run subsequent synchronizations using the same parameters. As part of the setup fee, a YourMembership.com Customer Service Specialist will assist you with the initial configuration.

What does the plug-in do?

The YourMembership synchronization feature within the plug-in for The Raiser's Edge allows you to initiate two-way synchronization of constituent records between The Raiser's Edge and YourMembership.com. To initiate a sync, simply access the YourMembership.com synchronization feature from within The Raiser's Edge software. Upon synchronization, the plug-in updates core member data including:

- Lost Member
- Primary Group Code
- Member Type Code
- Suspended
- Membership Date
- Membership Code
- Lost Member Notes
- Registration Verification Data Fields

What does the plug-in do? ...continued

Reporting and conflict resolution tools are important for any database synchronization efforts and both are available via the YourMembership.com plug-in for The Raiser's Edge. The plug-in automatically generates synchronization reports and logs that are easy to read and understand. Also, the plug-in stores these sync reports and logs for quick reference. As an added level of protection and accountability, the plug-in logs when – and which – administrators make modifications to the plug-in configuration settings.

For conflict resolution, the plug-in captures and illustrates which data fields have changed since last sync. It then allows you to decide whether to sync from The Raiser's Edge to YourMembership.com or from YourMembership.com to The Raiser's Edge. The plug-in also enables users to address data conflict resolution down to a field-by-field basis, and you may choose to review all records during the synchronization process.
